FINANCIAL UPDATE CONT.

Forecast projects NO changes to the current fee structure.

However, there are still numerous variables that can have an impact.

Examples are:

- Implementation of the maintenance agreement with Involta is expected to be completed July 1, 2024
- RFP for wide area network equipment replacement to determine if the estimate is accurate
- Security requirements may dictate additional expenditures
- Increases from Software/Maintenance providers
- Actual cost of firewall hardware
- Healthcare cost trends going forward

- Frontline MFA

FRONTLINE / GOOGLE MULTI FACTOR AUTHENTICATION

Tom Davies

How will this work?

- Requires all teachers/staff members have Google MFA enabled.
- Once the district users have enabled Google MFA, we can enable the link to the Frontline applications (GradeBook, ProgressBook, etc.)
- When a teacher logs into their Gmail in the morning, they will be prompted to MFA. Once they're logged into Gmail/Google, they can open one of the Frontline applications and they'll be automatically logged in.
- Google will force the users to MFA once every 12 hours.*

What Devices Can Users Use for MFA?

- Cell Phones (iPhone or Android)
- Security Key (such as YubiKey or Feitian Key)
- Tablets (iPad or Android)*
- Printable Backup Codes**

What Methods Can Be Used with MFA?

- Push Notification
- Text Message
- Voice Call***
- Authenticator App*
- Security Key Code
- Printed Backup Code**

When Is This Happening?

- Pilot districts will be chosen & notified before the end of April.
- All districts are encouraged to enable Google MFA for their staff this spring! This will save you time and headaches in the fall.
- There is limited time left to this school year, but we will migrate as many districts as we can this spring. The rest will be migrated in the fall.
- The biggest time factor in this migration is getting all the users enrolled in Google MFA. The actual configuration and implementation on the back-end is relatively easy.

SECURITY UPDATE

Pat Rager & Tom Davies

ACCESS Security Practices & Services

- Monthly Internal Vulnerability Scans (District Networks)
- Monthly Vulnerability & Security Review with Involta SOC Team
- Weekly External Vulnerability Scans by DHS (Whole Network)
- Weekly Internal Scans of all Access Systems
- Vulnerability Management Assistance*
- SentinelOne Endpoint Detection & Response (ACCESS Core)
- Albert Intrusion Detection System replaced by Involta SOC service
- SEIM upgrade from Alert Logic to Sumo Logic, May 2024
- Consortium pricing on:
 - Sophos EDR, Cisco Duo, INFOSEC TechGuard, and more
- Individual System Scanning/Hardening (CIS-CAT Pro)

Security Best Practices - Network Segmentation

Separate your network clients & devices by security-based roles:

- Guests
- Students
- Staff
- Admin
- District Resources (servers, printers, copiers, etc.)

Logical separation reduces your attack surface & exposure. It doesn't require any additional software or hardware, just careful planning and implementation.

Access can help you design a better network layout. Put in a help desk ticket to get started.
